

CAPSL's Commitment to Excellence

Global Standards Commitment

We are dedicated to upholding the highest international standards through rigorous quality control processes. Our adherence to ISO 9001:2015 for Quality Management, ISO 14001:2015 for Environmental Management, and ISO 45001:2018 for Occupational Health and Safety reflects our continuous commitment to delivering exceptional safety and efficiency in every service we offer.

Long-Term Support and Maintenance

Our commitment to your success does not end with the sale of equipment. CAPSL offers comprehensive support services, including routine maintenance, repairs, and the supply of genuine OEM spare parts. We are dedicated to keeping your gas compression systems operating at peak performance.

Invest in Reliability with CAPSL

Compression and Power Systems Limited (CAPSL) is a leading provider of comprehensive energy solutions, specializing in gas compression, gas processing plants, power generation, pumps, heat exchangers, and genuine OEM spare parts. We offer a full spectrum of services, including Engineering Procurement and Construction (EPC), Installation and Commissioning, Operations and

Maintenance (O&M), and Maintenance /Repair /Overhaul (MRO) services. Our commitment to quality, innovation, and reliability has established us as a trusted partner in the oil and gas industry.

POWER GENERATION SOLUTIONS

Reliable Power Solutions

At Compression and Power Systems Limited (CAPSL), we recognize that reliable power is crucial not only for successful oil and gas operations but also for homes, offices, and other essential environments. Our power generation solutions are meticulously crafted to meet the diverse demands of our clients, ensuring a consistent, efficient, and sustainable power supply across all applications. Whether you need robust gas generators or cutting-edge renewable energy systems, CAPSL provides comprehensive solutions that keep your operations and daily activities running smoothly and efficiently.

Why Choose CAPSL for Power Generation?

Expertise in Power Generation

With extensive experience in the energy sector, CAPSL offers unparalleled expertise in power generation. Our team understands the challenges of providing consistent power in remote and demanding environments, and we deliver solutions that maximize uptime and operational efficiency.

Advanced Technology and Innovation

We employ advanced technology to design and implement power generation

systems that adhere to the highest standards of reliability and efficiency. Whether your needs include gas generators, gas turbines, or hybrid renewable energy systems, our solutions are meticulously engineered to enhance your operations while complying with ISO 14001:2015 for Environmental Management.

Comprehensive Service Offerings

CAPSL offers a full range of services related to power generation, including equipment supply, installation, operation, and maintenance. Our turnkey solutions ensure that your power generation systems are tailored to your specific needs, providing seamless integration and long-term reliability.

Our Power Generation Capabilities

Reliable Power

Our power generation capabilities ensure dependable power delivery even in the most challenging environments. Our solutions are versatile and cater to a wide range of applications, including:

Residential

We provide reliable power solutions to keep homes running smoothly, ensuring uninterrupted electricity for everyday needs, emergency backup, and essential systems.

Industrial

Our power generation systems support industrial operations with consistent and robust energy, enhancing productivity and minimizing downtime in manufacturing, processing, and heavy-duty applications.

Oil & Gas

We offer specialized power solutions designed for the demanding conditions of the oil and gas sector, including remote sites and high-capacity facilities, ensuring reliable energy for operations, equipment, and safety systems.

Government

Our solutions are tailored to meet the stringent requirements of government facilities, providing reliable power for public services, infrastructure, and critical operations, while ensuring compliance with regulatory standards.
